1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	Description, Pages						
	1-4	6	as originally filed					
	Cla							
	1-3	ims, Numbers	as originally filed					
2.	Wit lanç	With regard to the language , all the elements marked above were available or furnished to this Author language in which the international application was filed, unless otherwise indicated under this item.						
	The	nese elements were available or furnished to this Authority in the following language: , which is:						
		the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).						
		the language of pub	lication of the international application (under Rule 48.3(b)).					
		the language of a tra Rule 55.2 and/or 55.	anslation furnished for the purposes of international preliminary examination (under 3).					
3.	. With regard to any nucleotide and/or amino acid sequence disclosed in the international app international preliminary examination was carried out on the basis of the sequence listing:							
		contained in the inte	rnational application in written form.					
		filed together with th	e international application in computer readable form.					
		furnished subsequer	ntly to this Authority in written form.					
		\Box furnished subsequently to this Authority in computer readable form.						
		The statement that t in the international a	he subsequently furnished written sequence listing does not go beyond the disclosure pplication as filed has been furnished.					
		The statement that t listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.					
4.	-The	ramendments have r	esulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).					
		(Any replacement sh	neet containing such amendments must be referred to under item 1 and annexed to this					
3.	Add	dditional observations, if necessary:

INTERNATIONAL PRELIMINARY International application No. PCT/EP 03/07983 EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

D1 (D1= WO 99/65314) discloses synergistic herbicidal compositions containing a 3-heterocyclic-substituted benzoyl derivative of formula (I) and Imazapyr, Imazamethabenz or Imazethapyr. The herbicidal mixtures according to independent claim 1 differ from the compositions described in D1 in that the compositions of the present invention comprise at least two imidazolinone compounds. The mixture according to claims 12-26 and 28 further comprises a compound c). Thus the claimed subject-matter of 1-32 is novel vis-à-vis D1 (Art. 33(2) PCT).

Given the teaching of D1 which is considered as the closest prior art, the problem underlying the present invention may be seen as that of providing synergistic compositions having improved herbicidal activity.

In the absence of comparison with the compositions containing a compound of formula (i) and one single imidazolinone compound described in D1, no unexpected effect resulting from the use of a mixture of two imidazolinone compounds (B) has been demonstrated. Thus the subject-matter of claims 1-11, 27, 29-32 cannot be considered as being inventive (Art. 33(3) PCT).

The quaternary mixtures according to claims 12-26 and 28 can be considered as being inventive since the mixtures containing a component C show a synergistic herbicidal effect.

The subject-matter of claims 1-32 is considered to be industrially applicable and the present application is therefore considered to satisfy the criterion set forth in Article 33(4) PCT.
